Underground engineering
for sustainable urban
development - Underground
infrastructure is essential
for delivery of services that
support a strong urban
economy and high quality
of life. However, current
underground engineering
practice and education do
not promote the
interdisciplinary and
systems-oriented
development approaches
that support urban
sustainability.
Underground engineering
for sustainable urban
development ... - An ad hoc
committee of the National
Academies have conducted
a study to explore the
potential advantages of
underground development

in the urban environment,
to identify the research
needed to take advantage of
these opportunities, and to
develop an enhanced public
and technical community
understanding of the role of
engineering of underground
space in the sustainability
of the urban built ...
